Carey & Co.– the largest law firm in Chile – was established in its present form in the year 1976. Its origins, however, can be traced to 1905 when Francisco Carey (1873-1946) started practicing law independently.

All its lawyers – whose curricula vitae can be found in www.carey.cl - are graduates from the most prestigious Chilean law schools and a large number of them have postgraduate degrees from non-Chilean law schools around the world. Carey & Co. attracts top law school graduates and provides them with training and experience that develop lawyers careers to the highest caliber. Almost all of its lawyers have spent their entire careers at Carey & Co., which has allowed the firm to help them achieve professional excellence. Although it has increased its size on the basis of only internal growth, it has made some few significant lateral hirings which include three former general counsels of three different major international banks with presence in Chile, a tax partner from a premier international auditing firm and a chief prosecutor of the IV Region of Chile.

Its industrial and commercial clients include many of the most prestigious companies and banks of the world (whose names can also be found in Carey's website), some of which have been clients over decades. The firm provides legal advice and services to industrial and commercial clients, including the world's premier companies in industries as different as aviation, pharmaceuticals, consumer electronics, mining, oil and gas, software, telecommunications and utilities; to financial enterprises including investment and commercial banks, investment companies and insurance companies, to governments and governmental bodies, and to international institutions and agencies.

The firm has participated in most of the privatization's processes undertaken by the Chilean government in the last two decades and in the biggest mergers and acquisitions that have reshaped Chile's mining, health, life insurance, management of pensions, utilities and telecommunications sectors in such decades. Carey & Co. has also been involved in some of the most complex natural resources and toll road financing projects implemented in Chile over the last decades. It has also been an active participant in the major e-commerce and high technology projects undertaken in Chile in the near past.

In antitrust, intellectual property, environmental and all areas of litigation, it has developed sophisticated and well staffed groups of lawyers who are regularly selected by some of the world's most demanding clients to represent them in their most important transactions and litigations. It has recently begun criminal law practice focused on white collar crime.
